**Motivation Letter – Candidacy for Board Membership  
Belgian Association of Nuclear Medicine (BELNUC)**

Dear Members of Belnuc,  
Dear colleagues,

I am writing this letter to express my motivation to join the Board of the Belgian Association of Nuclear Medicine. As an engaged professional in the field of nuclear medicine, I believe in the role and commitment of Belnuc to scientific excellence, interdisciplinary collaboration, and advancement of high standards in clinical practice, research, and education.

Throughout my professional career, I have been actively involved in nuclear medicine in Belgium since almost 14 years, both clinically and academically. My experience has allowed me to develop a broad understanding of the challenges and opportunities currently facing our field, including rapid technological innovation, evolving regulatory frameworks, and the increasing importance of collaboration with referring specialties and international partners.

During the last year I have been implicated in the validation and homogenization of Lu-PSMA documentation in order to simplify implementation of Theranostics across different Belgian nuclear medicine departments. I am actively engaged in putting in place collaborative efforts at a national level regarding radioligand therapy, where I believe multicentric strategies are the way to go if we want to keep Belgium as a renowned international player.

In addition to my scientific and clinical background, I bring a strong sense of collegiality and engagement. I value constructive dialogue, consensus-building, and transparent governance, and I am motivated to work collaboratively with fellow Board members, Secretary and President to serve the interests of both, established nuclear medicine professionals and younger colleagues entering the field.

It would be an honor to humbly contribute my time, energy, and expertise to the Belgian Association of Nuclear Medicine as a Board member, with the added responsibility of being the only member representing Institut Jules Bordet – Hopital Erasme and the Université Libre de Bruxelles (ULB).

Thank you for considering my application.  
Yours sincerely,

**Dr. Carlos Artigas (MD, PhD)**  
**Nuclear Medicine physician, Director of Clinic at H.U.B**  
**Institut Jules Bordet – Hopital Erasme (Université Libre de Bruxelles)**
